

Tiburon II Driveway Cleaning Project

Weather permitting driveway washing to clean the soot generated from the road paving project will **commence this Monday, February 24.**

Please see the attached map for the anticipated day the area where you live is being cleaned. Day 1 is Monday; Day 2 is Tuesday, etc.

Please make sure your autos are **removed by 7am each day** from the area (this includes your driveway and street area the crew is working on for that day)

Please **park on N. Palmetto Circle on the grass area** to allow access to your property and your neighbors and the area being worked on.

Please do not park in the street on the day the area is being worked on as emergency vehicles must be able to get through.

Please allow your driveway to **fully dry before** moving your auto back onto the driveway.

The next step for maintenance of the roads will take place in January 2027 and then every two years by applying a sealer and then repainting the lines.

If your unit is rented, please make sure you communicate with your tenants all information.

If you have any questions please call Crest Management Group 561-994-2334
